# Remote (Cloud Solutions)

For those who don't want to be limited by hardware and space. BEcloud is a Braineering-s cloud solutions branch, delivering hosted services over the internet to advance your business and employees' productivity.

IaaS - Infrastructure as a Service

Use allocated infrastructure resources to fire up your business. Easy and scalable access to computing resources and IT services over the internet! In the end, you need nothing but a personal computer and Internet access.

PaaS - Platform as a Service

Use allocated development tools hosted just for you or host your software after it's developed. Have as much or as little of a service as you want at any given time.

SaaS - Software as a Service

Get the software you desire over the internet. Use any web service on a computer or mobile device that has internet access.
